NDDOT to install traffic signal at intersection of ND Highway 40 and US Highway 2 south of Tioga

The North Dakota Department of Transportation (NDDOT) will bid out a contract next month for installation of a traffic signal system at the intersection of ND Highway 40 and US Highway 2 located south of Tioga. The contract will be bid to implement the traffic control system by the end of this year. The NDDOT has studied the intersection and determined that increase in traffic due to oil activity and energy development warrants implementation of additional traffic control in the area.
